SECTION A – TECHNICAL INFORMATION

1 INTRODUCTION

The Council for Scientific and Industrial Research (CSIR) is one of the leading scientific research and technology development organisations in Africa. In partnership with national and international research and technology institutions, CSIR undertakes directed and multidisciplinary research and technology innovation that contributes to the improvement of the quality of life of South Africans. The CSIR's main site is in Pretoria while it is represented in other provinces of South Africa through regional offices.

2 BACKGROUND

The CSIR has been contracted to design and build a Technology Demonstrator that will be in the form of a custom trailer and be housed in a modified 6 metre (20 foot) shipping container.

The project will require the manufacture of custom components. As CSIR has limited manufacturing capability, the components will be designed in-house and predominantly manufactured outside of the CSIR.

To facilitate the procurement of the manufactured components, the intention is to pre-contract a pool of manufacturers. These manufacturers will be required to have the necessary skills and experience to supply the required components.

3 INVITATION FOR PROPOSAL

Proposals are hereby invited from suitably-qualified service providers for the supply of manufactured components to the CSIR.

The manufactured components will require, but not be limited to, the following expertise and processes:

- Manual turning and milling of ferrous and non-ferrous parts.
- CNC turning and milling of precision ferrous and non-ferrous parts, with simple profiles or complex surfaces.
- Fabrication (2D profiling and bending) of precision sheet metal parts.
- Fabrication (2D profiling and bending) of large sheet metal parts, with thicknesses up to 16mm or lengths up to 6m.
- Spark or wire eroding capabilities.
- Welding facility capable of TIG welding of precision sheet metal and frame assemblies.
- Welding facility capable of MIG and arc welding large sheet metal and frame assemblies.
- Surface treatment facility capable of applying specified surface finish processes to ferrous and non-ferrous components in a repeatable manner, to MIL-STD specifications if required.

The manufactured components and supplier shall:

- Achieve a >95 % form and fit conformance to the supplied engineering drawings or provided generic transfer format 3D model. Non-conformance will be rectified by the supplier immediately and at the supplier's cost.
- All specified surface treatment must conform to the specified standard criteria, for example thickness build-up, environmental performance, and colour uniformity.
- Be able to deliver components, as the application requires, to the required tolerances and surface finishes.

4 PROPOSAL SPECIFICATION

All proposals are to be submitted in a format specified in this enquiry (if applicable). However, tenderers are welcome to submit additional / alternative proposals over and above the originally specified format.

The proposal should provide an average hourly rate for manufacturing tasks. This hourly rate would serve as a guideline for the CSIR.

The proposal should indicate the supplier's expertise and capabilities; and provide proof of experience in the claimed expertise and capabilities.

A contract will be entered into with the successful suppliers who establish suitability (functional) and availability for a contracted manufacturing task.

Each manufactured mechanical component shall be;

- manufactured according to the supplied drawings (including all specific and general tolerances) and/or the supplied generic transfer format 3D model.
- delivered with a component dimensional inspection report.
- delivered with a component finishing process Certificate of Conformance.
- delivered with a component manufacture material Certificate of Conformance.

Tasks will be contracted with the selected and contracted suppliers on an Ad Hoc basis. Successful suppliers are not guaranteed to receive work due to possible multiple suppliers being available for the same manufacturing process or capability.

A supplier may be asked to sign a Non-Disclosure Agreement (NDA).

5 FUNCTIONAL EVALUATION CRITERIA

- 5.1 The evaluation of the functional / technical detail of the proposal will be based on the criteria in Annexure A.
- 5.2 Proposals with functionality/technical points of less than the pre-determined minimum overall percentage of 80% will be eliminated from further evaluation.

6 ELIMINATION CRITERIA

Proposals will be eliminated under the following conditions:

- Submission after the deadline;
- Proposals submitted at incorrect location;
- National Treasury restricted supplier

7 NATIONAL TREASURY CENTRAL SUPPLIER DATABASE REGISTRATION

Before any negotiations will start with the winning bidder it will be required from the winning bidder to:

- be registered on National Treasury's Central Supplier Database (CSD). Registrations can be completed online at: www.csd.gov.za;
- provide the CSIR of their CSD registration number; and
- provide the CSIR with a certified copy of their B-BBEE certificate. If no certificate can be provided, no points will be scored during the evaluation process. (RSA suppliers only)
